**UNITED STATES DISTRICT COURT
 NORTHERN DISTRICT OF CALIFORNIA**

CHASOM BROWN, WILLIAM BYATT,
 JEREMY DAVIS, CHRISTOPHER
 CASTILLO, and MONIQUE TRUJILLO
 individually and on behalf of all similarly
 situated,

Plaintiffs,

vs.

GOOGLE LLC,

Defendant.

Case No.: 5:20-cv-03664-LHK-SVK

**PLAINTIFFS' NOTICE OF MOTION
 AND MOTION SEEKING RELIEF FOR
 GOOGLE'S FAILURE TO OBEY
 DISCOVERY ORDER**

The Honorable Susan van Keulen
 Courtroom 6 - 4th Floor
 Date: November 23, 2021
 Time: 10:00 a.m.

1 TO ALL PARTIES AND THEIR ATTORNEYS OF RECORD:

2 Please take notice that, on November 23, 2021, at 10:00 a.m., the undersigned will appear
 3 before the Honorable Susan van Keulen of the United States District Court for the Northern District
 4 of California at the San Jose Courthouse, Courtroom 6, 4th Floor, 280 South 1st Street, San Jose,
 5 CA 95113, and will then and there present Plaintiffs' motion (the "Motion") seeking compliance
 6 with the Court's April 30 Discovery Order (Dkt. 147-1) through additional productions or, in the
 7 alternative, an order establishing certain facts and precluding Google from opposing class
 8 certification or making any other arguments in this case in connection with the withheld materials.
 9 The Motion is based on this Notice of Motion and Motion, the attached Memorandum of Points
 10 and Authorities, the Declaration of Mark C. Mao, the Declaration of Erika Nyborg-Burch and
 11 exhibits attached thereto, the pleadings and other papers on file in this action, any oral argument,
 12 and any other evidence that the Court may consider in hearing this Motion.

13 **ISSUE PRESENTED**

14 Whether, under Federal Rule of Civil Procedure 37(b), the Court should issue an
 15 evidentiary sanction against Defendant Google LLC ("Google") for its violation of this Court's
 16 April 30 Discovery Order (Dkt. 147-1).

17 **RELIEF REQUESTED**

18 Plaintiffs respectfully request that the Court enter the proposed order requiring Google to
 19 within one week comply with the April 30 Discovery Order, including by searching for and
 20 producing identifiers and all data in Google's possession, custody, or control linked to any
 21 identifiers associated with the named Plaintiffs or their devices, including IP addresses and device-
 22 and [REDACTED] identifiers. To the extent Google fails to do so, Plaintiffs request that the Court
 23 rule that certain facts are established for this action and that Google be precluded from opposing
 24 class certification or making any other arguments in this case on the ground that the withheld data
 25 is not linked with or linkable to users.

26 Dated: October 14, 2021

MEMORANDUM OF POINTS AND AUTHORITIES

INTRODUCTION

Plaintiffs assert claims against Google based on Google's surreptitious collection and use of personal information from their private browsing communications, including URLs, referrer headers, user agents, IP addresses, and other information. There is no dispute that Google collects this information.

Plaintiffs have sought production from Google of the information Google collected from the private browsing of Plaintiffs and other class members and also data showing how Google uses that private browsing information, including the extent to which that data is linked or linkable to users. Plaintiffs requested that discovery a year ago, in September 2020. Since then, Google has gone to great lengths to withhold that discovery and obstruct Plaintiffs' ability to pursue these claims and seek class certification. There have been numerous filings and hearings, and a Special Master to assist with Plaintiffs' efforts to actually receive the data to which they are entitled. Google's obstruction has now risen to the level of directly violating a Court Order.

On April 30, 2021, this Court ordered Google to produce all identifiers and data associated with the named Plaintiffs and their devices, including not only what Google classifies as "authenticated" identifiers and data but also what Google classifies as "unauthenticated" identifiers and data. Dkt. 147-1 at 2 (the "Order"). Those are Google's two classifications, authenticated and unauthenticated, so this discovery order encompassed all identifiers and data associated with the

1 named Plaintiffs and their devices, including all so-called “authenticated identifiers.” Dkt. 147-1
2 at 2. This Court issued the Order in response to the parties’ disputes regarding class member
3 identification (issue “P6”) and described the ordered production as an “initial step” in Plaintiffs’
4 efforts to discover how to identify putative class members.

5 The Court’s directions were clear. [REDACTED]

6 [REDACTED]
7 [REDACTED]
8 [REDACTED]
9 [REDACTED]
10 [REDACTED]
11 [REDACTED] After that Order, Google made a limited production to Plaintiffs
12 and represented to the Court that there was nothing more it could produce. *See* Dkt. 211 at 1
13 (Google claiming it had “already produced authenticated data and relevant unauthenticated data”).

14 Google’s representations to the Court were false. With Special Master Brush’s assistance,
15 Plaintiffs now know that Google withheld data that it should have produced pursuant to the Court’s
16 Order, on the basis of Google’s own litigation say-so about whether the data is linked with or
17 linkable to Plaintiffs and their devices. [REDACTED]

1 [REDACTED]
2 [REDACTED]
3 [REDACTED]
4 [REDACTED] Google simply does not
5 want to turn over relevant discovery that would enable Plaintiffs and their experts to conduct their
6 analysis.

7 Google's misconduct is highly prejudicial to Plaintiffs. Almost six months after this
8 Court's Order, Plaintiffs have barely any of the data the Court ordered Google to produce. [REDACTED]
9 [REDACTED]
10 [REDACTED]

11 With the close of fact discovery quickly
12 approaching, and almost no data to provide their experts, Plaintiffs must now turn to the Court for
13 assistance, because even the Special Master agrees that the parties are at an impasse on certain
14 gateway legal issues regarding prior orders.

15 Just as importantly, Google needs to fully comply with the Court's April 30 Order so that
16 the current proceedings before the Special Master can be completed. On September 16, the Court
17 ordered that Google provide a list of all relevant data sources, provide the parameters and fields
18 available in these data sources, and search for data based on identifiers used for these sources. *See*
19 Dkt. 273. Without Google's compliance on the April 30 Order, even with the Special Master's
20 assistance, the parties simply cannot complete the tasks ordered in the September 16 Order.
21 [REDACTED]
22 [REDACTED]

23 With this Rule 37(b) Motion, Plaintiffs seek to address the prejudice caused by Google's
24 obstruction and violation of the Court's April 30 Order. Plaintiffs first ask that the Court provide
25 Google with one week to produce the identifiers and data, so that Plaintiffs may [REDACTED]
26 [REDACTED] To the extent Google fails to do
27 so, Plaintiffs ask that the Court's order make clear that Google's failure establishes certain facts
28

and precludes Google from presenting certain arguments. Such an order would properly reflect the principal that this Court recently recognized in precluding Google from utilizing information asymmetries in the context of the parties' dispute about identifying the websites that use Google Analytics and Ad Manager. Google should not be able to withhold information to gain an advantage at Plaintiffs' expense.

BACKGROUND

I. Google's Initial Obstruction of Plaintiffs' Discovery.

For over a year, Plaintiffs have been seeking the discovery at issue in this Motion. On September 30, 2020, Plaintiffs served RFP 10, seeking "Documents sufficient to identify all alleged class members, including all electronic or physical address information associated with alleged class members." Ex. A (RFPs Set One, Google's R&Os at 13).

Id. Plaintiffs on the same day served RFP 18, seeking "Documents concerning Plaintiffs, including Plaintiffs' use of Google services, all data collected by Google from and regarding Plaintiffs, and Google's use of all data collected by Google from and regarding Plaintiffs." *Id.* at 20.

In the ensuing months, Google obstructed discovery into these crucial issues on the basis of Google's say-so about whether the data sought is linked or linkable, stating:

- "Google does not associate a user's electronic or physical address information with a user's logged-out activity." Ex. B at 3 (December 14, 2020 letter).
- "Plaintiffs' unfounded speculation about how they might be able to link private browsing data to individual users in order to identify class members does not justify producing user-level data in response to RFP No. 10." Ex. C at 3 (January 21, 2021 letter).
- "[L]ogged-out private browsing data is not linked or reasonably linkable to a specific consumer." Ex. D at 1 (February 18, 2021 letter).
- "Google does not link logged out private browsing activity with an individual's Google Account and does not store electronic or physical

address information for logged-out users who are privately browsing. Google has offered to produce documents to show the logged-out private browsing activity of users is not linked, and is not reasonably linkable, to a user's Google Account." Dkt. 129 at 3 (April 7 filing).

Google's objections have been grounded on an improper distinction drawn by Google between data linked to users' Google accounts and data linked to various other identifiers used by Google to track [REDACTED]

Apr. 23 Tr. at 14:8-18. In response, [REDACTED]

Google continued to present this objection in the next joint discovery submission and hearing, [REDACTED]

Dkt. 140 at 5.

Plaintiffs gave lie to this claim by citing to Google's own documents explaining Google's secret, twice-baked cookie tracking system, which includes [REDACTED]

Id. at 4.

Almost a full year into the litigation, Plaintiffs reasonably sought further discovery into these Google tracking mechanisms to "meaningfully assess the identification of class members."

1 *Id.* Plaintiffs proposed to begin with the data for the named Plaintiffs, including by requesting
2 production of all “unauthenticated” data associated with the named Plaintiffs or their devices. *Id.*
3 Google still refused on the ground that the data sought [REDACTED]
4 [REDACTED] and to date has not made any cogent production.

5 **II. This Court’s April 30 Order Requiring Google to Produce All Authenticated and**
6 **Unauthenticated Data.**

7 Google lost this debate over data-related production.

8 During the April 29 discovery hearing, addressing similar issues in the *Calhoun v. Google*
9 matter (5:20-cv-05146-LHK-SVK), Google explained that [REDACTED]
10 [REDACTED]
11 [REDACTED]

12 *Calhoun* Apr. 29 Tr. at 44:6-10. The Court rejected Google’s proposed limitation, holding that
13 Google should produce [REDACTED]
14 [REDACTED]

15 [REDACTED]
16 [REDACTED]
17 [REDACTED]
18 [REDACTED]
19 *Calhoun* April 29 Tr. at 46:16-24 (emphases added).

20 Google made the same argument during the *Brown* portion of the hearing, going so far as
21 to belittle Plaintiffs’ counsel in front of the Court for his “speculation.”

22 [REDACTED]
23 [REDACTED]
24 But the Court again rejected Google’s request to withhold discovery on the basis of
25 Google’s say-so about the data. [REDACTED]
26 [REDACTED]
27 [REDACTED]
28 [REDACTED]

1 [REDACTED]
 2 [REDACTED]
 3 [REDACTED]
 4 [REDACTED]
 5 [REDACTED]
 6 [REDACTED]
 7 [REDACTED]

8 The Court subsequently issued its April 30 Order requiring Google to produce all
 9 “authenticated” and “unauthenticated” data for the named Plaintiffs, thus accepting Plaintiffs’
 10 compromise proposal to begin the process of class member identification by evaluating data
 11 associated with identifiers for the named Plaintiffs and their devices.

12 For RFP Nos. 10 (class identification) and 18 (individuals’ data), as an
 13 initial step, *Google will produce identification data for the named*
 14 *Plaintiffs*. Google will promptly supplement any production made to date
 15 with *authenticated data identifiers* as to both the individuals and their
 16 devices provided Plaintiffs have provided the necessary device information,
 17 *as well as unauthenticated data*.

18 Dkt. 147-1 at 2 (emphases added).¹ Google did not appeal that order, and instead simply chose to
 19 ignore it.

20 **III. Google’s Continued Obstruction, In Violation of the April 30 Order.**

21 Google has violated that clear order. Like it did before this Court’s April 30 Order, Google
 22 continued to insist that all productions be limited to data that Google considers to be indisputably
 23 associated with a particular user – at a level of “indisputability” that even Google does not use for
 24 its own ad services, and which is contrary to the rules of discovery.

25 ¹ Prior to the April 29 hearing, Google informed Plaintiffs that it required them to sign and email
 26 consent notices before Google would produce to Plaintiffs any of the data associated with their
 27 accounts or devices. On or around April 14, Plaintiffs’ counsel emailed consent notices to
 28 Google’s counsel and the address google-legal-support@google.com. Plaintiffs’ counsel helped
 their clients model the notices off of a consent notice template this Court ordered for the plaintiffs
 in the related *Calhoun* case. While Plaintiffs dispute that any consent notice was required, those
 consent notices were broad enough to encompass “authenticated” and “unauthenticated” data.

1 Following this Court's April 30 Order, Plaintiffs asked Google for assistance in locating
 2 all identifiers that might be used to query data associated with the named Plaintiffs or their devices.

3 See Ex. E (May 11 Letter). [REDACTED]
 4 [REDACTED]
 5 [REDACTED]
 6 [REDACTED]

7 Google refused, insisting that production be limited to data associated with brand new
 8 private browsing sessions. In a May 12 letter, Google offered: "if Plaintiffs provide Google with
 9 their unauthenticated identifiers, Google will provide data associated with those identifiers as well,
 10 to the extent any exists." Ex. G at 2 (May 12 letter). Google's letter instructed Plaintiffs to open
 11 a new private browsing session and to send to Google the cookie values listed within the
 12 "Developer tools" function on the browser. *Id.* The upshot is that Google was asking Plaintiffs to
 13 generate new cookie values, and Google would only produce data associated with those new
 14 cookie values, without running other queries for data previously collected by Google.

15 On May 26, in the parties' joint submission, Plaintiffs brought Google's obstruction to the
 16 Court's attention. Plaintiffs explained that Google was refusing to query its data based on
 17 identifiers associated with the named Plaintiffs, like IP addresses and device IDs.

18 Google is refusing to run searches on the unauthenticated data, based on the
 19 data produced with the authenticated, although Google's own internal search
 20 tool can easily search with such data. GOOG-BRWN-00028920 (screenshot
 21 of tool). For example, Google can search based on IP addresses and device
 22 IDs, both of which Google already has with the "authenticated data." But
 Google refuses to do so. In short, Google is refusing basic discovery on how
 it is collecting data for "unauthenticated users," including its undisclosed
 twice-baked cookies, when the allegations are at the core of the case.

23 Dkt. 177 at 8-9.

24 In response, Google represented to the Court that Google cannot produce any
 25 "unauthenticated" data other than data associated with brand new private browsing sessions:

26 Plaintiffs only provided "necessary device information" to query
 27 unauthenticated data yesterday (May 25), when they sent cookie values
 allegedly taken from a browser used by one named plaintiff. Google will

search for, and intends to produce, data associated with those cookie values. Google is unable to do more because Google's systems—including the tool Plaintiffs reference—are not designed to derive unauthenticated identifiers from authenticated identifiers.

Id. at 11.

During the June 2 hearing, this Court again instructed Google that Plaintiffs are entitled to all of the named Plaintiffs' data to test Google's say-so about that data.

June 2 Tr. at 33:1-7. The Court subsequently ordered the parties to brief the P3 (class member data) and P6 (class member identification) disputes, including Plaintiffs' request for cleanroom access to the [REDACTED] Dkt. 191-1 at 2.

In their brief, Plaintiffs requested that Google comply with this Court's April 30 Order, including by producing "all data linked or mapped to any identifier associated with Plaintiffs or their devices, including without limitation (including all data associated or mapped with authenticated, unauthenticated, device-based, pseudonymous, and any other identifiers, [REDACTED] [REDACTED] Dkt. 199 at 1.

Google, in response, represented to the Court that it had "already produced authenticated data and relevant unauthenticated data," citing the data tied to the Plaintiffs' new private browsing sessions. Dkt. 211 at 1. The Court subsequently referred these disputes to Special Master Douglas Brush. *See* Dkt. 220 at 2. The proceedings before Special Master Brush have revealed that Google's representations about their prior productions were false.

IV. Through Special Master Brush's Process, Google Has Been Forced to Admit that It Has Withheld Identifiers and Data Linked to Numerous Identifiers In Violation of this Court's April 30 Order.

With the Special Master's assistance, Plaintiffs are finally beginning to appreciate the full extent to which Google has violated this Court's April 30 Order. In response to Special Master Brush's request for Google to summarize its data production to date, Google admitted that it has

1 withheld data linked to numerous identifiers, including without limitation identifiers that Plaintiffs
2 provided to Google. On September 14, Google admitted:

3 [REDACTED]
4 [REDACTED]
5 [REDACTED]
6 [REDACTED]
7 [REDACTED]
8 [REDACTED]
9 [REDACTED]
10 [REDACTED]
11 Ex. H at 1 (Google's Sept. 14 letter) (emphases added). These Google admissions contradicted
12 Google's prior representations to the Court that Google could not produce any "unauthenticated"
13 data aside from the data associated with fresh private browsing cookies. It was now clear that
14 Google has been withholding data based its own say-so about the data's relevance and joinability
15 or linkability, in direct violation of this Court's instructions.²

16 Google also added a new objection to the production of "authenticated" identifiers. While
17 the April 30 Order requires Google to produce such "authenticated" identifiers associated with
18 Plaintiffs, Google informed the Special Master that it would not produce any of this "authenticated
19 data." Google tried to justify non-compliance by again attempting to re-define the scope of
20 relevant data to which Plaintiffs are entitled:

21 [REDACTED]
22 [REDACTED]
23 [REDACTED]
24 _____
25 ² Google's objection hinges on a factor that has no legal relevance to Plaintiffs' unlawful
26 interception claim. Whether or not Google uses the data for certain purposes proves nothing about
27 whether Google collects that data from users without their consent. Moreover, regardless of how
28 Google uses these identifiers internally, Plaintiffs are entitled to use this data in discovery, expert
reports, class certification, and at trial to demonstrate that class members are identifiable (among
other purposes).

1 [REDACTED]
2 Ex. I (Google's Sept. 17 letter). Google's representation makes clear that it maintains
3 "authenticated" identifiers and data linked to those identifiers, but has unilaterally decided not to
4 produce any of this information, in violation of this Court's Order.

5 **V. Google's Violations of the April 30 Order Are Preventing Compliance With the**
6 **Court's Three-Step September 16 Order.**

7 Google's failure to comply with the Court's April 30, 2021 Order has created a ripple effect
8 impeding virtually every aspect of the disputes put before the Special Master. For instance, on
9 September 16, 2021, the Court ordered that Google provide a list of all relevant data sources and
10 logs, the parameters and fields available in these sources, and searches based on identifiers used
11 for these sources. *See* Dkt. 273. Given Google's refusal to comply with the April 30, 2021 Order,
12 however, the Special Master cannot meaningfully complete the tasks required by the September
13 16 Order because Google refuses to provide the relevant information. [REDACTED]

14 [REDACTED]
15 [REDACTED]
16 [REDACTED]
17 [REDACTED]
18 [REDACTED]
19 [REDACTED] Plaintiffs noted these differences to
20 Google and the Special Master on October 3, 2021, citing to numerous Google documents. Ex. K
21 (Plaintiffs' October 3 letter). [REDACTED]
22 [REDACTED]
23 [REDACTED]

24 Plaintiffs cannot propose searches against data sources in a manner contemplated by the
25 September 16 Order without this additional information. To conduct a meaningful search, Google
26 has to both explain and actually provide Plaintiffs' identifiers as previously ordered. *See* Ex. K
27 (Plaintiffs' October 3 letter). Had Google complied with the April 30 Order, Plaintiffs could have
28

1 proposed searches tied to the [REDACTED] built by Google, with relevant identifiers,
 2 and would not need to guess as to what they are, how they are comprised, and how they are used
 3 – all of which are important to comply with the September 16 Order. By refusing to comply with
 4 the April 30 Order, Google has thwarted the objective behind the September 16 Order as well.

5 Google’s obstruction also involves other known more basic identifiers, such as IP
 6 addresses. [REDACTED]

7 [REDACTED]
 8 [REDACTED]
 9 [REDACTED]
 10 [REDACTED]

11 [REDACTED]
 12 [REDACTED]
 13 [REDACTED]
 14 [REDACTED]
 15 [REDACTED]

16 F (emphases added).

17 When the depths of Google’s defiance of this Court’s April 30, 2021 Order were finally
 18 revealed, Plaintiffs explained to Special Master Brush at a recent hearing that Google was openly
 19 violating that order. In response, Google inexplicably claimed that it did not need to comply with
 20 that Order until the Court explicitly reconfirmed to Google that it must do so. Special Master
 21 Brush invited Plaintiffs to seek relief from this Court regarding the “scope” of the April 30, 2021
 22 Order. Accordingly, Plaintiffs now move for relief under Federal Rule of Civil Procedure 37(b).

23 **ARGUMENT**

24 **I. Legal Standard**

25 Under Rule 37(b)(2)(A), when a party fails to comply with a discovery order, a court may
 26 impose “whatever sanctions are just . . . up to dismissal of part or all of the party’s claims.”
 27 *Sanchez v. Rodriguez*, 298 F.R.D. 460, 463 (C.D. Cal. 2014). Such remedies may include but are

not limited to establishing facts in favor of the moving party, prohibiting the party in violation from supporting designated claims or introducing designated matters in evidence, imposing monetary sanctions in the form reasonable expenses caused by the failure to obey, treating this failure as contempt, staying the proceedings until the order is obeyed, and dismissing the action. *See* Fed. R. Civ. P. 37(b)(2). Relief is warranted “not merely to penalize those whose conduct may be deemed to warrant such a sanction, but to deter those who might be tempted to such conduct in the absence of such a deterrent.” *Nat’l Hockey League v. Metro. Hockey Club*, 427 U.S. 639, 643 (1976). In addition, “discovery misconduct may be punished under the court’s ‘inherent powers’ to manage its affairs.” *Guifu Li v. A Perfect Day Franchise, Inc.*, 281 F.R.D. 373, 396 (N.D. Cal. 2012) (Koh, J.) (quoting *Unigard Security Ins. Co. v. Lakewood Eng. Mfg. Corp.*, 982 F.2d 363, 368 (9th Cir. 1992)).

II. Google Has Violated the April 30 Order.

The plain language of this Court’s April 30 Order requires Google to produce both “authenticated” and “unauthenticated” data associated with the named Plaintiffs or their devices. *See* Dkt. 147-1 at 2 (“Google will promptly supplement any production [of named Plaintiffs’ identification data] made to date with authenticated data identifiers *as to both the individuals and their devices* provided Plaintiffs have provided the necessary device information, *as well as unauthenticated data.*” (emphasis added)). This Order reflects the Court’s recognition, as articulated at the April 29 hearing, that

[REDACTED]

Pursuant to this Court’s Order, Google should have produced all responsive identifiers and data. This production should have included all data linked to identifiers associated with Plaintiffs or their devices [REDACTED] including both “authenticated” and “unauthenticated” identifiers.

1 Yet, almost six months later, Google has still not complied with the Court's Order, leaving
2 Plaintiffs with no way to [REDACTED] Google's contentions.

3 Google first represented that it had fully complied with the Order by producing data
4 associated with the cookies from brand new private browsing sessions, and that Google could not
5 produce any other unauthenticated data, whether correlated with other unauthenticated identifiers,
6 or authenticated identifiers. *See* Background III, *supra*. But, when called upon to substantiate this
7 claim to Special Master Brush, [REDACTED]
8 [REDACTED] *See* Background IV, *supra*. Google has attempted to justify its
9 non-compliance on the ground that it deems some of the unauthenticated and authenticated
10 information irrelevant. *Id.* Yet nothing in this Court's April 30 Order authorized Google to
11 redefine the scope of required production. Instead, the Court ordered Google to produce the data,
12 including both authenticated and unauthenticated data. *See* Dkt. 147-1 at 2. [REDACTED]
13 [REDACTED]
14 [REDACTED]

15 Plaintiffs suspect that Google is holding back data because Google is worried that
16 production will substantiate Plaintiffs' theories. [REDACTED]
17 [REDACTED]
18 [REDACTED]

19 [REDACTED]
20 [REDACTED]
21 [REDACTED]
22 [REDACTED]
23 [REDACTED]
24 Google's documents also explain that these identifiers [REDACTED]
25 [REDACTED]
26 [REDACTED]
27 [REDACTED]
28 [REDACTED]

1 [REDACTED]
 2 [REDACTED]
 3 [REDACTED]
 4 [REDACTED]
 5 [REDACTED]
 6 [REDACTED]
 7 [REDACTED]
 8 [REDACTED]
 9 [REDACTED]
 10 [REDACTED]

11 In any event, the parties can fight another day about whether the withheld data is linked
 12 with or linkable to users, including through the disputes referred to Special Master Brush.
 13 Plaintiffs now merely seek data for their experts to evaluate, consistent with this Court's Order
 14 and instructions.

15 **III. Google Should Be Required to Comply with the April 30 Order.**

16 Google should be required to search for and produce all data in Google's possession,
 17 custody, or control linked to any identifiers associated with the named Plaintiffs or their devices,
 18 including IP addresses and device- and [REDACTED] This is what the Court ordered
 19 Google to produce, and Google should have produced that data months ago.

20 Google is improperly attempting to re-litigate an issue that the Court has already resolved.
 21 Leading up to the April 30 Order, Google argued that it should not be required to produce the data
 22 it deems "unauthenticated" because such data [REDACTED]
 23 [REDACTED] Dkt. 140 at 5; *see also* April 13 Hearing Tr. at 15:16-20 (arguing that Google
 24 should not need to produce any data that is [REDACTED]
 25 Ex. H at 1 (Google's September 14 Letter) (asserting that Google need not produce data linked to
 26 identifiers that, according to Google, [REDACTED] But,
 27 as the Court already recognized, [REDACTED] rom

1 [REDACTED]
2 [REDACTED]
3 [REDACTED] The Court knew what
4 Google meant by “unauthenticated” data and why Google objected to such a production, and yet
5 the Court still ordered Google to produce “unauthenticated data”, as well as “authenticated”
6 identifiers, for the named Plaintiffs. Dkt. 147-1 at 2.

7 The Court had good reason to issue the April 30 Order. “Indeed, to deny discovery where
8 it is necessary to determine the existence of a class or set of subclasses would be an abuse of
9 discretion.” *In re Intuit Data Litig.*, 2017 WL 3616592, at *2 (N.D. Cal. Aug. 23, 2017) (van
10 Keulen, M. J.).

11 It does not matter whether [REDACTED]
12 [REDACTED] Ex. L at 5 (September 29 Letter). Google’s Privacy Policy provides
13 that Google “will share personal information outside of Google . . . to [m]eet any applicable law,
14 regulation, legal process, or enforceable governmental request.” Ex. M at 11 (Google Privacy
15 Policy). Here, this Court’s April 30 Order already requires Google to produce all data associated
16 with the Plaintiffs or their devices, and there is a Protective Order in place between the parties to
17 protect the confidentiality of all productions. *See* Dkt. 81. It is also ironic for Google to, on the
18 one hand, claim that data sought is not reasonably linkable to any person and, on the other hand,
19 refuse to produce the data on the ground that doing so would violate someone else’s privacy.
20 Google cannot have it both ways. Regardless, that a production might include data associated with
21 non-class members provides no basis for Google to withhold the discovery. *See, e.g., Hall v.*
22 *Marriott Int’l., Inc.*, 2021 WL 1906464, *13–14, 30 (S.D. Cal. May 12, 2021) (allowing discovery
23 outside of the class definition because it would assist plaintiff’s evaluation of claims); *see also*
24 *Digital Envoy, Inc. v. Google, Inc.*, 2005 WL 8162581, at *2 (N.D. Cal. July 15, 2005) (allowing
25 for discovery broader than plaintiff’s allegations).

26 Because of Google’s violation, Plaintiffs may need additional time to complete fact
27 discovery and prepare opening expert reports. Google’s non-compliance has deprived Plaintiffs

1 and their experts of five months that could have been spent evaluating the data. Moreover, this
 2 Court's April 30 Order was just the "initial step" in the process of discovering class members.
 3 Dkt. 147-1 at 2. Plaintiffs have separately requested cleanroom access and source code review,
 4 and the Special Master has decided to postpone any decision about those requests until after
 5 Google completes its productions of Plaintiffs' data. Google's obstruction has severely prejudiced
 6 Plaintiffs' and their experts' ability to complete and evaluate those inspections, with the close of
 7 fact discovery now just three months away, and expert reports due three weeks thereafter.
 8 Plaintiffs hope to revisit timing with the Court after Google completes its required production.

9 **IV. Alternatively, Plaintiffs Are Entitled to Evidentiary Sanctions.**

10 If Google is unwilling to produce all of the data, as required by the April 30 Order, then
 11 the Court should issue an evidentiary sanction. If a party does "not obey[] a Discovery Order,"
 12 Rule 37(b)(2)(A)(i) permits the court to "direct[] that the matters embraced in the order or other
 13 designated facts be taken as established for purposes of the action." This Court issued the April
 14 30 Order to give Plaintiffs an opportunity to [REDACTED]

15 [REDACTED] Apr. 29 Hearing Tr. at 19:2-7. Because Google failed to comply, the Court
 16 should "take[] as established for purposes of the action" that all of Google's so-called
 17 "unauthenticated" data is linked or linkable to users, including all private browsing information
 18 Google collected during the class period. Fed. R. Civ. P. 37(b)(2)(A)(i). "Court intervention to
 19 protect Plaintiffs' ability to prove the[ir] allegations is necessary" when, as here, "[t]he withheld
 20 evidence is uniquely within the possession of the Defendants" and "there was no way for Plaintiffs
 21 to test their theory" as a result of the "documents withheld." *Guifu Li v. A Perfect Day Franchise,*
 22 *Inc.*, 281 F.R.D. 373, 393 (N.D. Cal. 2012) (Koh, J.); *see also Zurich Am. Ins. Co. of Illinois v.*
 23 *World Priv. Sec., Inc.*, 2020 WL 8610839, at *5 (C.D. Cal. Nov. 23, 2020) ("As a result of
 24 [defendant's] shortcomings, the Court finds that evidentiary sanctions against it are warranted.
 25 Plaintiffs assert that there are certain factual matters at issue in [Plaintiff's] discovery that must be
 26 established for the purposes of this action. Accordingly, the Court finds that the following matters
 27 are established for the purposes of this action . . .").

Google should likewise be precluded from presenting any arguments in this case concerning whether such data is linked or linkable to Plaintiffs and other class members. *See* Fed. R. Civ. P. 37(b)(2)(A)(ii) (permitting the court to “prohibit[] the disobedient party from supporting or opposing designated claims or defenses, or from introducing designated matters in evidence”). “Preclusionary orders ensure that a party will not be able to profit from its own failure to comply.” *Sas v. Sawabeh Info. Servs.*, 2015 WL 12711646, at *9 (C.D. Cal. Feb. 6, 2015) (quoting *United States v. Sumitomo Marine & Fire Insurance Company, Ltd.*, 617 F.2d 1365, 1369 (9th Cir. 1980)). “[I]t is entirely reasonable to sanction [Google’s] defiance of the [April 30] Order by precluding them from presenting evidence on [issues for which Google] ha[s] not provided timely and complete discovery.” *Sas*, 2015 WL 12711646, at *11 (C.D. Cal. Feb. 6, 2015). Otherwise, Google will benefit from any evidentiary gaps that it has caused by refusing to comply with this Court’s April 30 discovery Order. “Discovery is first and foremost a way for one party to determine the evidence supporting another party’s allegations, so it can properly investigate that evidence prior to trial.” *Lanier v. San Joaquin Valley Offs. Ass’n*, 2016 WL 4764669, at *8 (E.D. Cal. Sept. 12, 2016). Google “has thwarted [Plaintiffs’] efforts to understand the basis of” Google’s ascertainability defense, so it is “appropriate, based on these failures, to preclude [Google] from introducing further facts or evidence in response to these issues.” *Id.*

Evidentiary sanctions are particularly important for Plaintiffs’ anticipated motion for class certification. For example, in *Guifu Li v. A Perfect Day Franchise, Inc.*, 2011 WL 3895118, at *3 (N.D. Cal. Aug. 29, 2011) (Koh, J.), after the defendant refused to produce a corporate representative, in violation of a Court Order, the plaintiffs moved for a preclusion remedy, arguing that “the information withheld from Plaintiffs could very well bear on whether or not Plaintiffs are able to establish commonality of issues across the putative class.” This Court granted the motion: “[t]o remedy the prejudice suffered by Plaintiffs in their class certification motion, [defendant] is prohibited from utilizing declaration evidence (from Mr. Zou or any other corporate designee) regarding its corporate structure or ownership in its opposition to class certification/collective action.” *Id.* at *4; *see also Hanni v. Am. Airlines, Inc.*, 2009 WL 1505286, at *5 (N.D. Cal. May

1 27, 2009) (defendant moved for sanctions because “Plaintiffs’ repeated failure to comply with their
2 discovery obligations has prejudiced [defendant’s] ability to prepare for Plaintiffs’ class
3 certification motion,” and the court ruled that “Plaintiffs may not rely on any discovery provided
4 after the close of class certification discovery in support of their motion for class certification or
5 in opposition to Defendant’s motion to deny class certification.”).

6 This Court recently applied these principles to an unrelated discovery dispute in this case
7 that did not even involve Google’s failure to comply with a Court Order. Plaintiffs and Google
8 had reached an impasse as to Plaintiffs’ requests for Google to identify all websites that use Google
9 Analytics or Google Ad Manager. This Court did not require Google to identify all of the websites,
10 but the Order cautioned that “before Google can argue or assert that any specific website did not
11 use Google Analytics, Google must respond to this interrogatory as to that website at least 30 days
12 in advance of making any such assertion or argument.” Dkt. 288-1 at 1; *id.* at 2 (same for Ad
13 Manager). The Court should now apply the same logic to Google’s refusal to produce all of the
14 data associated with the Plaintiffs or their devices. Preclusion is all the more appropriate here
15 because Google has already been ordered to produce the data.

16 Indeed, Google’s months’ long obstruction warrants preclusion regardless of whether
17 Google ultimately agrees to produce the data. Google has jeopardized Plaintiffs’ experts’ ability
18 to “conduct the required analysis within the time limits set [by the Court].” *Oracle USA, Inc. v.*
19 *SAP AG*, 264 F.R.D. 541, 557 (N.D. Cal. 2009) (precluding party from presenting evidence
20 concerning alleged lost profit damages for failing to timely produce the relevant data); *see also*
21 *Apple Inc. v. Samsung Elecs. Co.*, 2012 WL 1595784, at *3 (N.D. Cal. May 4, 2012) (preclusion
22 warranted for belated production of relevant source code because “Apple’s experts were left with
23 no meaningful opportunity to comprehend this code, even as they face criticism from Samsung in
24 deposition (and assuredly at trial) that their code analysis was deficient”).

25 CONCLUSION

26 For these reasons, Plaintiffs respectfully request that the Court order Google to comply
27 with the April 30 Order by producing all data that are associated with Plaintiffs or their devices

1 and all data linked to all identifiers associated with the Plaintiffs or their devices, including without
 2 limitation IP addresses and device- and [REDACTED] In the alternative, Plaintiffs ask
 3 the Court to take as established for purposes of this action that all of Google's so-called
 4 "unauthenticated" data is linked or linkable to users. Google should also be precluded from
 5 presenting any arguments in this case concerning whether such data is linked or linkable to
 6 Plaintiffs and other class members.
